

A new day at CBMMS

CRAFTING THE BETTER FUTURE

Our Mission

"As a University, we believe that honesty, loyalty and integrity are the main pillars for the betterment of the community. We craft masters of our future through discipline, learning, service and excellence."

NEWS AND EVENTS

Guided by our commitment to education and research and to our community's health and safety, CBMMS has welcomed many more students, faculty, staff, and researchers back to campus this academic year. Supporting our community's wellbeing while advancing CBMMS's academic enterprise requires our collective participation in the University's adaptable, multi-layered health and safety measures. Through robust commitment at the University, School, and individual level, we can all play a role in preventing the spread of infection and can help keep CBMMS healthy.

The Computer and Business Masters Main Science University (CBMMS) is an international educational institution leading in science and technology innovation and business management. CBMMS will vow to foster diversity, uphold disciplines and shape the lives and future of the society.
